### Discontinuation of ID smartSCANN DY products and accessories

Dear Sir or Madam.

FEIG ELECTRONIC strives to provide you with products of highest performance, quality and excellent design at any time through continuous development.

We are pleased to inform you about the current developments in our product portfolio.

This is why we would like to announce that we will discontinue the product line **ID smartSCANN DY** of our product family “Panmobil – portable solutions“ as well as all accessories listed here to the indicated dates and replace them with our redesigned and technically improved product line **ID ECCO+**.

In addition to the usual barcode and RFID UHF functionality, the product line **ID ECCO+** will now also be available in three RFID HF versions and can therefore be easily integrated into existing systems in which ID smartSCANN DY devices are currently used. The **ID ECCO+** offers even more functions, a higher ruggedness, longer operation time, higher performance and better scanning and reading results compared to devices of the product line smartSCANN DY – in the highest quality of **FEIG ELECTRONIC**.

The product line **ECCO+** is based on the same hardware and software platform as the product line ID smartSCANN DY and provides a 100% compatibility. Applications in which devices of the product line ID smartSCANN DY have been used so far, can be operated seamlessly without any adaption or can be extended with devices of the product line **ID ECCO+**. Even parallel operation of smartSCANN DY and **ECCO+** devices is possible. From firmware to software, drivers, SDKs up to communication protocols, both product families are compatible to each other.

Individual configurations created for ID smartSCANN DY can also be transferred directly to devices of the **ID ECCO+** product line.

We offer our services and replacement batteries for the ID smartSCANN DY series in familiar quality, beyond the discontinuation period of the devices, until mid-2021.
