FEIG

PayServ.TerminalControl

TERMINAL MANAGEMENT SYSTEM

- One centralized Web Portal for managing all cVEND Terminals
- Remote. Anytime. Effortless configuration and commissioning.
- Proactive Monitoring featuring alerts and warnings
- Unlimited Software Updates

With FEIG PayServ.TerminalControl, you maintain a clear overview of your Payment Terminals at all times – easy, secure and efficient. This web-based solution offers all the features of a modern Terminal Management System for all cVEND Terminals DK (German Banking Industry Committee).

Stay in control. Reduce service costs. Boost your efficiency with FEIG PayServ.TerminalControl.

Features at a glance:

- Organize your terminal stock in the user-friendly PayServ. Connect web portal using custom labels and practical filters to quickly locate individual devices.
- With the terminals in permanent connection, remote access for commissioning or configuration changes is guaranteed at any time.
- Device-specific alerts and warning messages notify you of anomalies early on. This allows you to respond effectively, minimize downtime, and sustainably increase the availability of your terminals.
- Software updates can be installed quickly and easily, even on multiple terminals simultaneously. Unlimited.

PAYSERV.TERMINALCONTROL

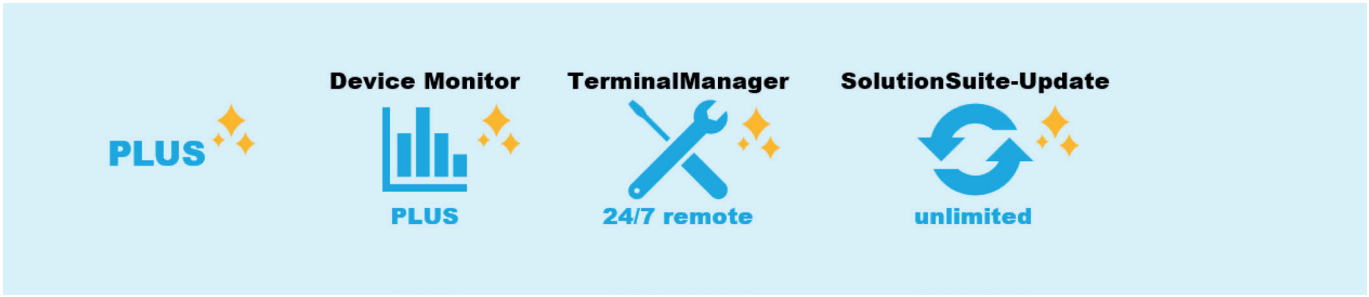

Terminal Management System

The available features are grouped into flexible service models. For each terminal, you decide individually which functions you want to use. You benefit from maximum control, full cost transparency, and a service that's tailored exactly to your needs.

Within PayServ.TerminalControl, you can access your terminal list in the PayServ.Connect portal. You can also take advantage of the following additional optional service models:

- **BASIC:** The BASIC Service Model provides access to basic terminal configuration, maintenance, and monitoring for the selected terminals. It is an ideal addition to on-site service operations at the terminal.
- **PLUS:** The Service Model PLUS offers extended remote access for selected terminals, enabling terminal configuration, maintenance, and comprehensive monitoring, including alarms and warnings. Software updates for the FEIG Payment application are included for these terminals. Ideal for remote service. Anytime.
